

KRISTY DELLINGER

I have been working in the Medical Staff Profession since 2018. For the past five years I have worked at North Valley Hospital as their Medical Staff Coordinator. North Valley Hospital is a small critical access facility in Northern Okanogan County, WA state.

I have worked in the Healthcare field since I graduated from high school in 1999. I started out as a Certified Nursing Assistant in a Skilled Nursing Facility for a few years, then moved on to the hospital setting. In the hospital setting I was able to learn many other positions such as; Telemetry Monitor Technician, Health Unit Coordinator, Case Management Discharge Coordinator. Upon relocation to WA state from AZ I worked as a Medical Assistant and then took a chance on moving into administration for the role of Medical Staff Profession and has decided this is where I want to settle down. I am currently planning to test for my CPCS and CPMSM in 2025.

My husband Jim and I have been together since 2002, we have five kids and five grandkids and are looking forward to many more joining as the younger ones are moving into adult life and settling down. We enjoy glamping and going for rides in our razor to explore. We have three dogs, many chickens and raise livestock during the spring and summer on our small piece of land.
